Other News

Emily Miller, MD, has been awarded funds through the Friends of Prentice Special Programs Initiative. COMPASS (a collaborative care model for perinatal depression support services) will fund educational programs on perinatal mental health as well as the embedding of psychiatric and psychological care within the NM prenatal clinics.

The Department of Psychiatry and Behavioral Sciences was pleased to host the first Brookstone Conference, September 23, 2016 at Prentice Woman's Hospital. This conference, which we anticipate is the first of several annual conferences to come, was made possible through the philanthropy and generosity of Adrienne and Arnold Brookstone. The theme for this inaugural Conference was Meeting the Challenges of Emerging Mental Illness. Presentations spanned novel research and clinical developments addressing diagnostic and risk factors, service delivery, and innovative inter-

ventions for youth and young adults with emerging forms of serious mental illness. We have assembled speakers from our Faculty, Lurie Children's Hospital, the Department of Psychology, along with community partners including Thresholds. Our keynote speaker, Patrick McGorry, MD, PhD, is a world-leading researcher in the area of early psychosis and youth mental health, and is a key architect of the transformational reform of mental health services provided to young people with emerging mental illness in

Australia. The conference was attended by mental health researchers, clinicians, and trainees across a range of disciplines including psychiatry, psychology, social work, and nursing.
